SALOMÓN MURIEL

ENTREPRENEUR AND
TECHNOLOGY BUILDER

five companies, two sold, two failed

Salomón has spent more than ten years founding companies and building the technology they run on. He is co-founder of Ignia, a new model for higher education. Alongside it he advises and speaks on two subjects: how to start a business from zero, and how to decide, build and fix a company's technology, with AI built in.

BASED IN BOGOTÁ, COLOMBIA

TODAY CO-FOUNDER OF IGNIA

This brief is for speaker agencies, event organisers and teams looking to hire him. Everything in it can be quoted as written.

CONTENTS

- 02 Consulting: entrepreneurship and technology
- 03 Talks and workshops
- 04 One-to-one mentoring
- 05 Track record, bio and contact

02 • CONSULTING

Two areas. He handles both himself, with no team in between.

What he advises on

AREA 01

Zero-to-one entrepreneurship

For anyone starting a business, tech or otherwise: their own company, a startup, a nonprofit or a new line inside an existing company. The goal is to get from an idea to paying customers.

WHAT HE WORKS ON

- Testing the idea with real customers before investing in it.
- Business model and true costs, labour included.
- The first customers, and what to do about the ones who don't come back.
- What to build first and what to leave for later.
- Partners, team and funding.

WHO IT'S FOR

Early-stage founders, traditional businesses getting started, nonprofits and corporate ventures.

TRACK RECORD

Five companies in very different sectors: flowers, lending, blockchain, real estate and education. Two were sold and two failed.

AREA 02

Technology: strategy and building

For companies that need to decide what technology to build, how to build it, or what to do with what they already bought. Salomón sets the strategy and, when the project calls for it, writes the software himself.

WHAT HE WORKS ON

- What to build and what to buy: a technology roadmap.
- Reviewing existing technology: what works, what's surplus and what still needs connecting.
- Custom software, connected to the systems the company already uses.
- Applied AI: agents for office work and AI-assisted software development.
- A team able to maintain and change its own tools.

WHO IT'S FOR

Traditional companies whose operations depend on manual work, founders without a technical lead, and leadership teams about to invest in technology.

TRACK RECORD

He led data and product at R5, where he built the data pipeline and the risk-modelling system. At Ignia he built the website, course operations, the CRM and the community portal.

HOW HE WORKS

1. The same person decides and builds

What gets decided on Monday starts being built on Tuesday. There's no consultant handing over slides for a vendor to interpret.

3. He builds with AI

He codes with AI agents instead of outsourcing, and teaches the client's team to use them.

2. He starts with how the work is done today

The tool is designed around the real operation, not around software made for another company. That's why people use it.

4. Everything belongs to the client

The code, the accounts and the access. Nothing depends on him staying on the project.

✗ **What he doesn't do:** Scaling large corporations, research into new technology, and long reports for boards.

03 • TALKS AND WORKSHOPS

Conferences, companies, universities and trade bodies. In person or remote.

What he talks about

he talks about what he's done, not what he's read

- 01

Entrepreneurship without the romance
Five companies, two sold and two failed. What worked, what didn't, and what he'd do differently starting today.

UNIVERSITIES, ACCELERATORS AND
FOUNDER COMMUNITIES
- 02

Building tech outside a tech company
From Finco to Ignia: what to build, what to buy, and how to decide when nobody on the board is technical.

LEADERSHIP TEAMS AND FOUNDERS
- 03

Applied AI, with real use cases
Agents for work that isn't programming, shown live on real product, operations and sales tasks.

COMPANIES AND TEAMS OUTSIDE TECH
- 04

Maker mindset
Grit, curiosity, resilience and creativity. Building with whatever is at hand.

STUDENTS AND TEAMS THAT NEED TO
MOVE SOMETHING NOW

WORKSHOPS

The same subjects in hands-on form. The team works on its own cases and leaves with something working.

- ✓ AI for non-technical teams: everyone brings a repetitive task and leaves with an agent that does it.
- ✓ From idea to first customer: a business idea turned into a validation plan for the following week.

FORMATS

- Talk**
An hour on stage, with Q&A at the end.
- Workshop**
A hands-on session on the team's own cases.
- Panel**
With a moderator or other guests.
- Podcast**
Recorded or live.

- VENTAJA PODCAST

04 • MENTORING

One to one, every week.

One-to-one mentoring

For people starting something who want someone to follow up with them every week. Each session ends with concrete assignments, and the next one starts by reviewing them.

04 • MENTORING

FORMAT	ONE TO ONE, BY VIDEO CALL
CADENCE	ONE HOUR A WEEK
BETWEEN SESSIONS	OPEN WHATSAPP LINE
MINIMUM	THREE MONTHS
CAPACITY	FIVE PEOPLE AT A TIME
SO FAR	SEVEN PEOPLE MENTORED

A WEEK OF MENTORING

- 1. The session.** An hour on the mentee's case, no set syllabus.
- 2. The list.** They leave with concrete tasks for the week.
- 3. The week.** They do the work. If they get stuck, they write.
- 4. The review.** The next session starts with that list.

THE ONE RULE Two weeks in a row without the assignments done, and mentoring is paused.

IT SUITS

- ✓ A business of your own that hasn't taken off yet.
- ✓ A nonprofit or social organisation.
- ✓ A startup in its first months.
- ✓ Someone reinventing their career with something to get off the ground.

For people who'd rather learn in a group, with a curriculum and peers at the same stage, there's Ignia's Action Lab.

OUTSIDE WORK

Franco and Luca, on shoulders

Father of twins

Franco and Luca were born in 2022 and take up nearly all of his free time. Because of them, he doesn't work on Sundays.

Lifelong gamer

He grew up glued to video games and learned English playing online. He still plays.

Maker

He has a workshop full of tools and a 3D printer. If something can be built at home, he tries.

Runner

He ran the Bogotá half marathon in 2:10 and is looking for the next goal.

05 • TRACK RECORD

Including the ones that didn't work.

What he has built

	Ignia 2025 • now Co-founder. A new model for higher education in Latin America, profitable from its first programme.	ACTIVE
	R5 Executive Led data and product, with around forty people reporting to him. Built the data pipeline and the risk-modelling system.	EMPLOYEE
	Finco 2019 • 2022 Real-estate valuation with data and AI for Latin America.	SOLD TO RED ATLAS
	PrestaGente 2017 • 2019 Peer-to-peer payroll lending. Still operating.	SOLD TO TAURUS CAPITAL
	Beriblock 2018 • 2019 Promissory-note authentication on blockchain. The technology worked; the market didn't exist.	FAILED
	El Palomo 2016 • 2017 Flower subscriptions.	FAILED

His father and grandfather were business owners too.

BIO FOR THE PROGRAMME

Salomón Muriel is an entrepreneur and technology builder based in Bogotá. He has founded five companies: two were sold, two failed, and today's is Ignia, a new model for higher education. Before that he led data and product at R5, with around forty people reporting to him. He advises founders starting from zero and companies that need to decide, build or fix their technology.
